A talk on world water day 2024

A talk on world water day organized on 22 march 2024 by the department of MBA,SEA College of Engineering and Technology, Bangalore. The day planned from the college by interacting with students and faculty to understand the scarcity and importance of water now a days. Dr Anil Kumar professor of MBA gave a warm welcome speech to all students and faculty members.

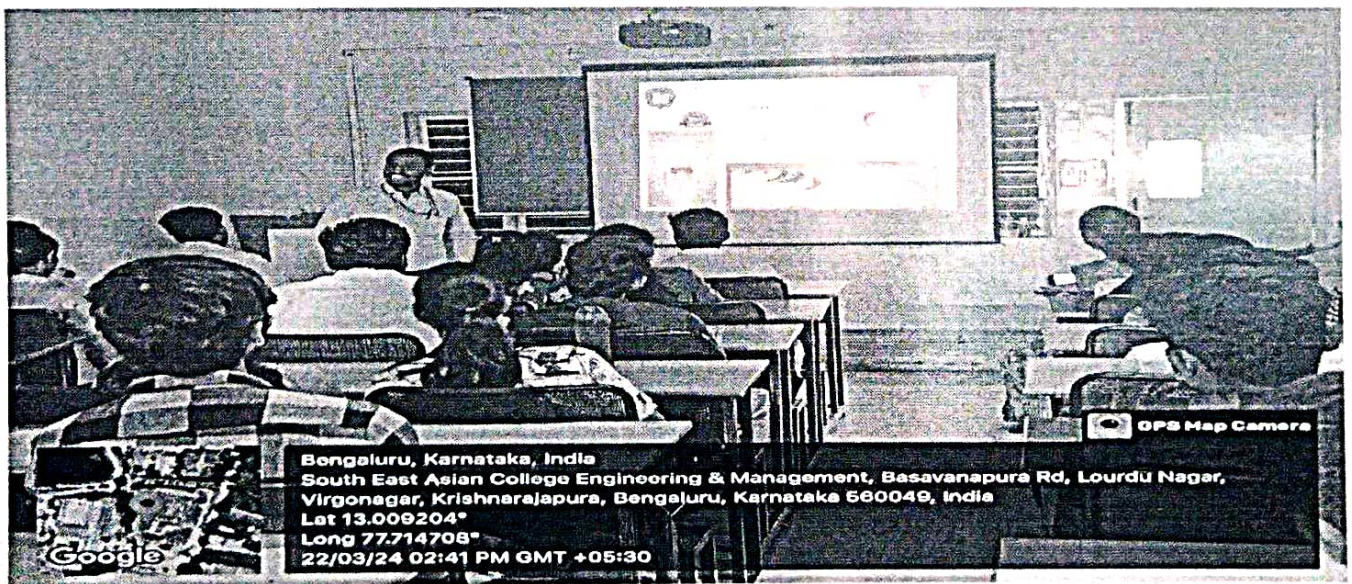

OBJECTIVES OF THE EVENT

- **Raising awareness about water conservation:** The seminar provided participants with a clear understanding of water conservation.
- **Promoting sustainable water management practice:** The seminar aimed to promote management practice in our daily life.
- **Advocating for access to clean water and sanitation globally:** The seminar provided participants to think about the global sanitation which helps to maintain clean water and even atmosphere
- **Showcasing innovative solutions for water related challenges:** The seminar boosted the participants to showcase innovative solutions for water related challenges.
- **Inspiring action to address water scarcity and pollution:** The seminar inspired the participants to take action against pollution and scarcity of water.

Overall, the objective of the seminar provided participants with the necessary knowledge about the water which can lead impact on water scarcity and water pollution. Dr. Anil Kumar sir conveyed his valuable words regarding water storage and water pollution. Even how now a days cities like Bengaluru facing water scarcity and pollution of water and how to overcome these problems.

Snap from the event are presented below.

The seminar ended by 3:30 pm on 22 march 2024. The event was ended with the vote of thanks by prof. Kasthuri.

Outcome of the event:

- Increased awareness: Through campaigns and events, more people may become aware of the importance of conserving water and the global water crisis.
- Policy changes: Governments and organizations might be prompted to implement new policies or strengthen existing ones to improve water management, sanitation, and access to clean water.
- Community initiatives: Local communities may launch projects to address water scarcity, pollution, and other water-related challenges in their areas.
- Innovation and technology: The focus on World Water Day could spur innovation in water-saving technologies, wastewater treatment, and sustainable water management practices.
- Collaborative efforts: Stakeholders from various sectors may come together to collaborate on solutions to water-related issues, fostering partnerships and collective action.

Overall, the outcomes of World Water Day 2024 will depend on the level of engagement, commitment, and action taken by individuals, governments, and organizations around the world.
