OBJECTIVE OF INDUSTRIAL VISIT

1. To understand the process and concepts present in Sewage Treatment Plant system.
2. The visit includes explanation and demonstration by the facilitators, with all the details and benefits of Sewage Treatment Plant.
3. To know step by step procedure in each stage of treatment and to know the various contaminant removable methods.

OUTCOMES OF INDUSTRIAL VISIT

1. During this visit students also become familiar with the working principle and function of various units in the treatment plant, such as Screening, Grit Chamber, Primary Clarifier, Aeration Tank, Secondary Clarifier, Sludge Digester, etc.
2. During visit, students also learned about the daily monitoring procedure adopted in the treatment system by various chemical analysis.
3. This visit was helpful for the students to get the practical knowledge regarding the function and process of Sewage water treatment plant and learnt how it can be utilized for domestic purpose {Agriculture, hydroelectric, etc.,}.
